

JAGANNATH SAMRTHA MISHRA

+ 91 9078251990 | jagannathmishra540@gmail.com | Chennai,Tamil Nadu| Portfolio: [Jagannath](#) — [Portfolio](#)

PROFILE SUMMARY

Technically driven and self-motivated Computer Science student from SRM KTR with practical experience in AI, machine learning, and full-stack development. I’ve developed systems such as an AI document summarizer, a lie detection model using microexpressions (Inception v4 + CASME3), and an OCR-NLP- based term sheet validator. Skilled in Python, React, Firebase, and local model training using VS Code, I work confidently across domains like image processing, NLP, and real-time classification. Known for being creative, focused, and persistent, I combine strong problem-solving skills with a passion for building real-world solutions.

PROJECTS

Cam Spector

Designed and developed a responsive AI-powered Vehicle Crash Detection System using React.js, Tailwind CSS, and TensorFlow. Built the frontend for real-time image classification, enabling users to upload visuals and receive instant crash detection results. Trained a custom CNN model on labeled crash and non-crash image datasets, achieving over 75% accuracy. Ensured modular integration of AI/ML backend with a user-friendly, scalable frontend architecture for future enhancements like video stream input and automated alerts.

E-commerce-Forecasting-ML-Model

A machine learning-powered system that forecasts e-commerce sales by analyzing historical data, customer behaviour, seasonality, and external factors. It helps businesses make informed decisions, optimize inventory, and plan marketing strategies with accurate, real-time predictions in fast-changing online markets.

Synth-AI

To create a captivating and modern user experience for your AI Carbon Monitoring System, the front end will feature a two-stage entry. It begins with a custom loading animation, like a "Neural Leaf" that visually merges the concepts of AI and sustainability, engaging the user while the application initializes. This animation will smoothly transition into a stunning hero page with a dynamic, subtly animated background—such as a futuristic data center—overlaid with a clean welcome message and a single call-to-action button. This deliberate sequence elevates the standard login process, immediately establishing a sophisticated and innovative tone that primes the user for the powerful dashboard and AI-driven optimizations within the platform.

Kisan Mitra AI

Kisan-Mitra AI is a mobile platform designed to empower Indian farmers by transforming their smartphones into a powerful agricultural tool, tackling critical challenges like market uncertainty, climate risks, and resource management. Its core Marketplace feature provides real-time crop prices, allows farmers to lock in a price for five days, and guarantees a direct, commission-free sale to a verified buyer. The app also offers hyperlocal weather predictions to mitigate climate risks, instant pest and disease diagnosis from a photo to protect crops, and soil health guidance to optimize fertilizer use. By combining these tools, Kisan-Mitra AI aims to make farming a more predictable, profitable, and secure livelihood.

EEG Stress Detection & Emotional State Analysis

This cutting-edge application leverages deep learning and Google's Gemini AI to analyze electroencephalogram (EEG) signals and provide comprehensive insights into mental states. Built with a modern, intuitive interface, it offers real-time stress detection and emotional state categorization.

- **Upload & Analyze:** Support for .mat EEG files with instant processing
- **Real-time Stress Detection:** Binary classification (Stressed/Relaxed) with confidence scores
- **Stress Score:** Precise percentage-based stress level measurement (0-100%)
- **Multi-Channel Analysis:** Processes 32 EEG channels simultaneously

SKILLS

- **Programming Languages:** Python, C++, JavaScript, TypeScript
- **Back-end Development:** Express, REST API
- **Front-end Development:** HTML, CSS, Tailwind, Shad-cn, React, Next-JS
- **Databases & Storage:** PostgreSQL, MongoDB
- **Development Tools:** Git, GitHub, Postman, VS Code, PyCharm, Jupyter Notebook, Cursor
- **Data Science & Analytics:** Pandas, NumPy, Matplotlib
- **AI & Machine Learning:** ML Techniques, NLP, LLM, TensorFlow

Certification

- Introduction to Machine Learning -IIT Kharagpur
- The Complete Python Bootcamp From Zero to Hero -Udemy
- Machine Learning I -Columbia University
- Data Visualization – Kaggle
- C/C++-Udemy

EDUCATION

SRM UNIVERSITY KTR ,Chennai ,Tamil Nadu

[2023-2027]

Bachelor of Technology: Artificial Intelligence and Machine Learning

Stewart School, Cuttack, Odisha
ICSE (Class 10) — **Year of Completion: 2020**
Percentage/Grade: **91%**

Nalanda College, Cuttack, Odisha
CHSE (Class 12) — **Year of Completion: 2023**
Stream: **Science**
Percentage/Grade:85%/A+

CGPA: 8.75
